Re: Junior Python Developer

Dear Hiring Manager,

I am writing to express my interest in the junior software development role at *****, as advertised on Indeed.

As a current undergraduate with a Diploma degree in Computer Science, I have acquired a strong foundation in programming languages including Python, as well as experience working with databases.

In addition to my technical skills, I have a strong background in project management. During my time at College, I led a team of developers in a software development project where I was responsible for project planning, risk management, and stakeholder communication. I successfully delivered the project on time and within budget and received positive feedback from stakeholders.

I am very confident that I have the qualities and qualifications that will shine at *****, as I would be an asset to the team. Thank you for your time and consideration of my application, I look forward to speaking with you soon to review my qualifications in more detail, I can be reached at mahmoud.farghali@georgebrown.ca.

Respectfully yours,
Mahmoud
